Applicant's election without traverse of Group I, claims 1-4, in Paper No. 4 is acknowledged. Applicant's election of arsenic as the anionic contaminant species, and CuFe_2O_4 as the sorbent material species is also acknowledged. Accordingly, claims 5-8 are withdrawn from further consideration, as being directed to a non-elected invention.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(a) as being anticipated by Sivavec (U.S. Patent No. 6,238,570). The reference discloses contacting water containing chromate (see col. 5, line 65) with a treating agent comprising magnetite (see col. 5, line 9), and this is all that is required by claims 1-4.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Dawson et al. (U.S. Patent No. 4,134,831). The reference discloses contacting water containing arsenate (see Table I in col. 4) with a treating agent comprising magnetite

Art Unit: 1724

(see col. 5, line 67 through col. 6, line 5), and this is all that is required by claims 1-4.

Eberly (U.S. Patent No. 4,263,020) discloses removing contaminants from a fluid with "spinel" type sorbent materials. Lee et al. (U.S. Patent No. 4,326,961) discloses removing anionic contaminants from an aqueous medium with similar inorganic sorbents.
